

VIVEK BHATI

Jersey City, NJ | +1 (551) 358-8540 | vivekbhati9192@gmail.com | linkedin.com/in/vivek-bhati-94324063/

PROFESSIONAL SUMMARY

Lead Software Engineer with 11 years of experience in full-stack web development, specializing in React.js, Node.js, TypeScript, and AEM integration. Proven success in leading teams, driving architectural improvements, and delivering scalable, high-performance web applications for the Investment, finance and healthcare domains. Skilled in Agile methodologies, accessibility, performance tuning, and implementing secure, modern front-end ecosystems.

CORE COMPETENCIES

React.js | Node.js | TypeScript | Redux | JavaScript (ES6+) | Express.js | Storybook | Material-UI | GraphQL | AEM | Adobe Analytics | Jest | Cypress | CI/CD | Jenkins | GCP | Agile/Scrum | System Design | Security & Performance Optimization

PROFESSIONAL EXPERIENCE

Senior Software Engineer – LTIMindtree (Client: Lord Abbett)

Bangalore, India - May 2021 – June 2025

Jersey City, NJ | June 2025 – Present

- Led the front-end modernization of LordAbbett.com, implementing a scalable architecture using React, Redux, and AEM, improving performance and maintainability.
- Integrated Storybook for component-driven development, enabling design consistency and reducing QA turnaround time.
- Collaborated with back-end teams to optimize and improve data fetching using GraphQL, AEM Servelt and the implementation of reusable Components.
- Implemented security best practices by addressing ReDoS, SSRF, and rate-limiting issues, reducing Snyc-reported vulnerabilities at Front end.
- Served as Scrum Master in multiple sprints—managed sprint planning, retrospectives, and coordinated release management with Lord Abbett’s global teams.
- Mentored junior developers and drove internal documentation and accessibility improvements across multiple modules.
- Utilized Adobe Analytics to enhance application performance reporting and data-driven insights
- Contributed to AEM component development, expanding expertise on the backend to support full-stack capabilities.

Senior Software Engineer – Emids Technologies (Client: Medidata)

Bangalore | Jul 2018 – May 2021

- Engineered a clinical trial management platform used by global clients (Pfizer, J&J), optimizing React components and reducing page load times.
- Worked with Cypress for end-to-end automation, increasing test coverage from 60% to 95%.
- Built reusable React and Node modules for secure data processing, cutting code duplication by 40%.
- Ensured zero post-release defects across multiple production rollouts through BDD / TDD and CI/CD pipelines on AWS.
- Leveraged multiple React libraries and frameworks—including Redux-Saga, React-Select, Node.js, and Express—to build high-performance, scalable web applications.

Software Engineer – HealthAsyst Pvt Ltd

Bangalore | Jan 2017 – Jul 2018

- Designed and developed modules for a hospital order management system using C#, .NET, MVC, and SQL Server, improving data entry efficiency.
- Delivered multiple standalone components independently and received the Star Team Award for top performance.
- Streamlined legacy workflows using Windows Forms → MVC, improving maintainability and reducing downtime.

Software Engineer – SLK Software Pvt Ltd

Bangalore | Sept 2014 – Jan 2017

- Developed a loan processing platform for SMB clients using React, ASP.NET, and SQL, improving application usability.
- Collaborated with business analysts to build reusable UI components, reducing feature delivery time.
- Implemented mock testing using WireMock and contributed to the development of MVC Web API architecture.

EDUCATION

M.Tech in Data Science — Birla Institute of Technology, Pilani (2020–2022)

B.Tech in Computer Science — Ajmer Institute of Technology, Ajmer (2009–2013)

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals

Google Cloud Engineer Certification

PUBLICATIONS

Node.js – The Beginning

Node.js – V8 Engine

Declaration

I hereby declare that the above information is true to the best of my knowledge.
